

Jordan Rickman

jordan.rickman.42@gmail.com • 407-205-9597 (daytime cell) • <http://jordan-rickman.net>

Junior software engineer, returning to industry after a year in academia. Strong experience in Java, Python, and full-stack web development including REST API specification and integration.

Programming Environments:

- **Javascript** - jQuery, AngularJS, HTML/CSS
- **Java** - backend, JSON REST APIs, SQL, MongoDB
- **Python** - backend, JSON REST APIs, scripting/automation

Experience

TravelClick Orlando, FL

APR 2015 – AUGUST 2015

Software Engineer

- Worked on a team transitioning legacy software to a Java enterprise service bus architecture.
- Added a feature logging requests to an Elasticsearch database.
- Of own initiative, built a web GUI in AngularJS to the WireMock mocking service, greatly streamlining our integration testing process.

AAA National Office Lake Mary, FL

Programmer Analyst

SEP 2014 – APR 2015

- Full-stack web development - jQuery frontend, Java backend
- JSON REST APIs development, with data validation and translation from 3rd-party APIs.
- Integration with both SQL (Oracle) and NoSQL (MongoDB) databases.

Wireless Health Institute at UCLA Los Angeles, CA

Student Researcher

JUNE 2013 - AUGUST 2013

- Automated our data analysis pipeline using Python scripts.
- Revised an Android app to use multi-threading, leading to significant improvement in responsiveness.

Education

University of California, Irvine

SEPT 2015 - JUNE 2016

PhD Informatics (Software Engineering) - *incomplete*

- Coursework in software architecture and human-computer interaction.

Rollins College Winter Park, FL

AUG 2010 - MAY 2014

Bachelor of Arts with Honors in Mathematics

Minor in Computer Science

- Concentration in theoretical computer science and discrete math, with coursework in formal logic, graph theory, formal languages, and automata.

Projects

Geo-Poetry

E-LIT PROJECT AT UC IRVINE

- Developed a REST API in Python using the Flask microframework, and a web frontend using AngularJS.
- Managed software development lifecycle using a test-driven methodology.
- Code available open-source at <https://github.com/UCI-TPL>.

Artificial Intelligence and Course Timetabling

UNDERGRADUATE HONORS THESIS

- Developed a novel algorithm to solve timetabling problems using graph-coloring heuristics.
- Modified a Java desktop application to use the new algorithm, including a complete redesign of the data structures and addition of caching, both needed to reduce memory usage.
- Presented work at an international conference.
